SUMMARY

Android & Mobile Developer with 4.5 years of native mobile development experience using Kotlin and Java. Skilled in Android SDK, Jetpack Compose, MVVM architecture, and REST API integration.

SKILLS

- Languages: Kotlin, Java
- Android Components: Jetpack Compose, Room DB, Retrofit, Coroutines, LiveData, Dagger/Hilt
- Tools: Android Studio, Git, Postman, Firebase Crashlytics, Bitrise

WORK EXPERIENCE

Android Developer | PhonePe

05/2022 - Present

- Built merchant payment acceptance flows using Kotlin and Jetpack Compose.
- Implemented local transaction storage using Room DB and asynchronous tasks using Kotlin Coroutines.
- Optimized application memory footprint, reducing app crash instances by 35%.

Junior Android Engineer | AppTech Studios

11/2019 - 04/2022

- Developed native Android applications using Java and Kotlin with MVVM architecture.
- Integrated REST APIs using Retrofit and parsed JSON data payloads.
- Configured Firebase Cloud Messaging (FCM) for targeted push notifications.

EDUCATION

B.Tech in Computer Science | JNTU Hyderabad (2019)

PROJECTS

- Real-Time Crypto Tracker: Native Kotlin Android application utilizing Retrofit, Jetpack Compose, and WebSocket connections.
